

## Reshma Jadhav

Wismar | Germany | Information Technology and Services  
Software Test Engineer | Quality Analyst  
Contact : +4915906779344  
Email : jagtapdakshayani23@gmail.com

### Key Skills

*Describes main experiences and knowledge.*

Requirements analysis and management, Manual Testing, API Testing, Object Oriented Programming, Agile-SCRUM, Automation Testing, Quality Assurance and Quality Control, Team collaboration, Client Communication, Team leading, Knowledge sharing, Telecommunication and Healthcare domain knowledge

### Selected projects

*Shows list of all your significant projects.*

#### Infosys – GSK (09/2021-12/2021)

Worked as an individual tester and was involved in all QA activities. Within a short time span, I was able to meet the changing user requirements. Got appreciated from clients for delivering quality software together with agile team members

Responsibilities:

- Standardized Test plan, Test scripts, Execution, Investigating and fixing bugs, Scrum Reporting.
- Test demo creation and presentation to the clients.

#### Infosys– Pfizer (05/2020 – 08/2021)

As a senior member of testing team I played important role to release a quality software to end user in multiple healthcare domain applications. Managing and analyzing business and user requirements. Worked in multiple agile teams.

Responsibilities:

- Collaboration with development team
- Exploratory Testing
- Functional and Database testing
- Worked as a test lead for a project and presented to the client.
- Established proper team communication that identified, triaged, reproduced and fixed found issues.
- Received INSTA award for my contribution in successfully handling a critical application
- Tools and technologies used: JIRA, Zephyr ,MYSQL

#### Infosys – British Telecom (12/2019 – 04/2020)

As a Flow Designer I was involved monitoring and supporting development and deployment activities.

Responsibilities:

- Development support
- Involved in deployment and Production support
- Tools and technologies used: BT's internal tools ESCAMP (Flow Design), Eclipse, GIT, ORACLE-SQL

#### Accenture – British Telecom (04/2015 – 11/2019)

Joined as a junior tester and got promoted to senior level. Involved in most of the SDLC and STLC activities. Had daily basis calls/meetings with BA and stakeholders for requirement analysis.

Responsibilities:

- System testing, Integration testing, Regression.
- Traceability Matrix to fill in the gap between requirements and test covered contributing to the 10% increase in the test case count
- Production support
- Presentation to the PO/BA/Client
- Tools and technologies used :HP ALM, Excel, Siebel CRM
- Received Apex award and BT recognition award for delivering new product successfully.
